

YOUR PARTNER FOR FLEXIBLE PACKAGING SOLUTIONS

 **DERIBA GROUP**
PACKAGING SOLUTIONS

„Our companies have been collaborating successfully on various projects for many years. By founding the DERIBA Group, we can achieve even more and increase our potential for national and international growth.“

Thomas Rose & Frank Rieker

CEO DERIBA Group GmbH

THE DERIBA GROUP.

Having established a good basis of trust and worked together successfully for many years, the six experienced and competent companies Anton Debatin GmbH, Debatin SARL, Riba GmbH, pfc premium film company gmbh, HVB Hoch-Vakuum-Beschichtungs GmbH and BeRec GmbH have now joined forces to bundle their strengths and expertise in the DERIBA Group.

STEPPING FORWARD TOGETHER IN STRENGTH. _____

With a total turnover of more than €100 million per annum and more than 400 employees, the DERIBA Group ranks amongst the leading companies in Europe for flexible packaging solutions. Our merger puts us in a position to inspire customers and the industry with innovative product developments and cater even better to national and international market demands.

_____ ACHIEVING MORE TOGETHER.

In future, the DERIBA Group will offer an even wider range of flexible and innovative packaging solutions (including tamper-evident security bags, self-adhesive document pouches and mailing bags, food packaging, recycled films, lamination films as well as special and effect films). In doing so, our focus is on innovative product developments, high quality and an environmentally-friendly mindset and approach.

OUR COMMITMENT TO THE ENVIRONMENT

HAND IN HAND FOR THE ENVIRONMENT. _____

Plastic waste in the oceans, microplastics, global warming – we all know things have to change. We take active responsibility, having created an own recycling system within our Company group and produce the basic material out of films from recycled PE. In other words, the materials we use are given a “second life”.

Calculate your product's CO₂ savings:
www.deriba-group.com

For this purpose, all films and safebags manufactured by the DERIBA GROUP are collected after use together with other films and packaging materials. These are then pre-sorted and channelled into the BeRec GmbH recycling process. Once they have been washed, dried and melted down, the materials are pro-cessed into PE pellets. RIBA GmbH then deploys a technique known as extrusion to turn the pellets into new film, which either they or Debatin process further to make new bags.

contains recycled film

The mark of responsible forestry

THESE ARE THE SYMBOLS THAT DERIBA STAND FOR. _____

Carbon neutrality

Our efficient and climate-neutral production saves resources. We compensate unavoidable carbon dioxide emission by climate neutral measurements.

Blauer Engel

« The Blue Angel », German symbol since four decades for environmentally friendly and resource-saving products, has been awarded to our products from recycled plastics.

PE recycling

The PE logo indicates that recycled film has been used. In other words, waste film has been channelled back into the manufacturing process and given a “second life”.

FSC®

By using FSC®-certified wood, we help to protect our forests and their unique ecosystem, and play our part in ensuring responsible forest management.

ANTON DEBATIN GMBH & DEBATIN SARL

“Our long-standing experience, flexibility and innovative strength make us an ideal partner for individual and reliable packaging solutions.”

SPECIALIST FOR INDIVIDUAL PACKAGING SOLUTIONS AND TAMPER-EVIDENT SAFE BAGS.

Founded in 1923, the Anton Debatin GmbH – a family-owned company which is based in Bruchsal and now managed by the third generation – and its subsidiary Debatin SARL in Hoenheim (France) now rank amongst the market leaders in the industry. Specialising in the development and production of secure and customised packaging solutions for transport, dispatch and logistics, Debatin’s strengths lie in its professional expertise, long years of experience, high levels of flexibility and quality, and its comprehensive and competent customer service. The entire company and products from the DEBAsAFE™, UNIPACK™/DEBAPAC™ and DEBAPoST™ ranges are carbon-neutral.

APPLICATIONS & INDUSTRIES

DEBATIN has been producing packaging for nearly 100 years. Today, the primary focus is on printing and customising logistics packaging for transporting anything from documents to medical samples to forensic evidence. DEBASAFE™ safebags are primarily used for collecting and transporting cash. Banks, CVIT companies, police authorities, laboratories and companies in the aerospace and automobile industries rely on tamper-evident and customised packaging solutions developed by Debatin.

CORE COMPETENCIES

- SECURITY BAGS
- SELF-ADHESIVE DOCUMENT POUCHES
- MAILING BAGS AND COURIER BAGS
- CASH PACKAGING, LABELS AND SEALS
- FLAT BAGS AND GRIP-SEAL BAGS

CERTIFICATIONS

- ☆ Management system certified according to DIN EN ISO 9001:2015
- ☆ « Blauer Engel » certification
- ☆ Climate-neutral
- ☆ PE recycling
- ☆ FSC®

RIBA GMBH

"We've been developing and producing superior quality polyethylene films and packaging solutions for more than 100 years."

SPECIALIST FOR HIGH QUALITY AND FLEXIBLE POLYETHYLENE FILMS & MAILING BAGS.

Riba Verpackungen GmbH, based in Hamm, is one of the oldest yet most modern polyethylene film factories in the whole of Europe. Founded in Hamm (Westphalia) in 1908, and now in the hands of the fourth generation, the company specialises in the production of high quality and flexible polyethylene films for a wide range of applications and industries. Ongoing research and development guarantee reliable and individual film and packaging solutions, manufactured in an exceptionally sustainable manner. The materials used are flawless and the resulting products of consistent superior quality.

APPLICATIONS & INDUSTRIES

The range of applications for polyethylene films produced by Riba GmbH is as wide as the products themselves are flexible. Whether as packaging for frozen foods, in the paper and beauty products industries, for pet food or a wide range of wholesalers – the hallmarks of Riba PE films are versatility, high performance and durability. Besides offering protection against environmental factors and meeting the highest safety requirements, they also have an appealing, high quality feel. When customised – with a special company layout, for example – Riba GmbH packaging solutions are also effective vehicles for advertising. Using raw materials and energy resources in a sustainable, responsible and economic manner is an essential cornerstone of the corporate philosophy.

CORE COMPETENCIES

- MANUFACTURING AND DEVELOPING PE FILMS
- PACKAGING FILMS
- MAILING BAGS AND POUCHES
- CARRIER BAGS

CERTIFICATIONS

- ☆ Certification according to BRC / IOP
- ☆ Management system certified according to DIN EN ISO 9001:2015
- ☆ Energy management system according to DIN EN ISO 50001:2011
- ☆ « Blauer Engel » certification

PFC PREMIUM FILM COMPANY GMBH

“It's our combination of know-how and customer service which enable us to develop innovative solutions.”

”

APPLICATIONS & INDUSTRIES

Coated and laminated films protect against environmental factors. They can also increase both the value and recognition factor of products. Printed matter and paper products such as books, brochures, cards and posters need special protection against the elements (e.g., water and dirt). But films such as “ECO STAR” (cellulose/acetate) also meet the stringent demands made on countless other products and items in industries as varied as the food industry, beauty products industry, automobile suppliers or the pet industry, to name but a few.

SPECIALIST FOR LAMINATION FILMS, SPECIAL EFFECT FILMS AND PACKAGING FILMS.

Founded in 2009, the pfc premium film company gmbh develops and produces state of the art lamination films, special effect films and packaging films in superior quality. Customers benefit not only from the company's long-standing experience and technological expertise in the fields of lamination films and packaging, but also from the excellent advisory services and customer service offered by the Hamburg-based company. Printed matter, packaging and boxes produced by the pfc premium film company gmbh meet the most exacting requirements – not only in appearance and feel, but also in their technological processing qualities. The processing potential and design potential are limitless.

CORE COMPETENCIES

- LAMINATION FILMS AND PACKAGING FILMS
- SPECIAL EFFECT FILMS
- FILMS MADE FROM SUSTAINABLY SOURCED RAW MATERIALS

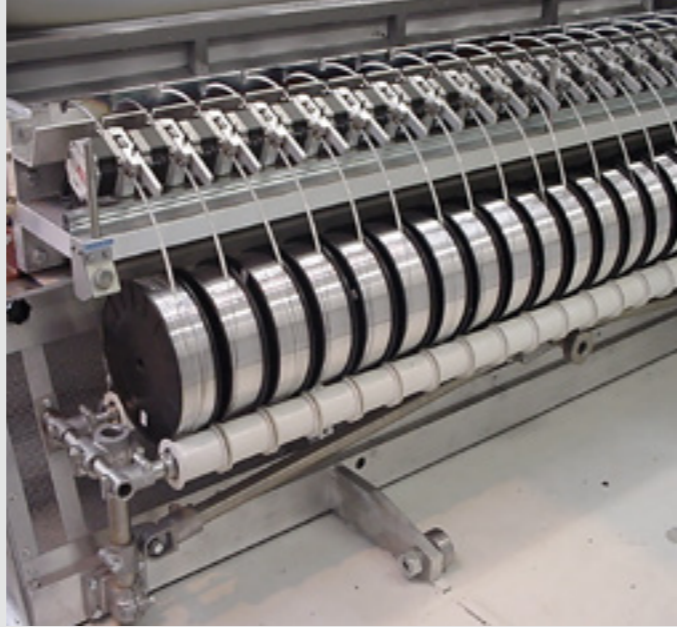

CERTIFICATIONS

- ☆ ECO-STAR certification since June 2018, compostable semi-finished product
- ☆ Certified by DIN CERTCO

HVB HOCH-VAKUUM- BESCHICHTUNGS GMBH

”

“Our coated films, fabrics, non-woven materials and papers provide reliable protection, have excellent technological properties, and look and feel great.”

APPLICATIONS & INDUSTRIES

Functional or luxurious, aromatic coffee, dry baby food or classy packaging for beauty products – the quality and functionality of coated and metallised films, fabrics, non-woven materials and papers from HVB are consistently high. Naturally, they also meet all the demands made by the cosmetics, food and pharmaceutical industries for barrier protection, safety and environmental protection. The technological, visual and haptic properties of coated films provide optimum and reliable protection against environmental factors, damp and loss of flavour. At the same time, their appealing look and feel help to increase sales and have a proven impact on buying decisions. In particular, metallised premium products meet the high quality expectations of consumers.

SPECIALIST FOR SPECIAL FILMS AND SPECIAL FINISHES.

In 1998, the Berlin-based company HVB began specialising in providing high quality metallisation and finishes for various materials, designed to meet the most exacting requirements. As a versatile specialist and service provider for films and foils, the company has been producing special films and packaging solutions which enhance the appeal of products and provide reliable protection against depreciation in quality and environmental factors. In doing so, HVB ensures it uses valuable raw materials and energy in an economically viable and sustainable manner.

CORE COMPETENCIES

- FILMS WITH SPECIAL FINISHES
- HIGH-VACUUM METALLISATION OF FILMS, FABRICS AND PAPERS
- BARRIER FILMS AND SPECIAL FILMS

CERTIFICATIONS

- ☆ Management system according to DIN EN ISO 9001:2015
- ☆ Certification according to BRC / IOP
- ☆ Energy management system according to DIN EN ISO 50001:2011

BEREC GMBH

”

“As a certified recycling plant, we guarantee the environmentally-friendly production of quality regenerates and ongoing development in recycling technology.”

SPECIALIST FOR QUALITY REGENERATES & RECYCLING.

Founded in Werneuchen in 1991, BeRec GmbH is certified as a specialist disposal and recycling company which concentrates on the manufacture of high quality regenerates for the foils and films industry. The entire recycling process is accompanied by the consistent use of closed loop cycles for all the resources used in production (energy, water, and air). Winner of the Brandenburg Future Award 2011, an active participant in the Environment Committee of the Chamber of Industry and Commerce in East Brandenburg and a member of the Brandenburg Environment Partnership, the company is constantly seeking innovative way to further develop recycling technology.

APPLICATIONS & INDUSTRIES

In the BeRec disposal and recycling plant, used materials are processed before being made into new products. First, the pre-sorted materials are washed and dried; next, the clean, shredded film is melted down and transformed into small, high quality PE pellets which vary in composition, colour and MVR. These regenerates form the basis for new film, extruded for example by RIBA. This is where the recycling process comes full circle. BeRec is a guarantor for the environmentally friendly and high-quality plastic recycling of all recycler associations in Germany. Customers receive a document to certify that their waste materials are recycled professionally in the plant.

CORE COMPETENCIES

- **MANUFACTURE OF HIGH QUALITY REGENERATES FOR THE FOILS AND FILMS INDUSTRY**
- **PROCESSING OF LDPE AND LLDPE FILMS INTO QUALITY REGENERATES**

CERTIFICATIONS

- ☆ certified as a specialist disposal and recycling plant
- ☆ Energy management system certified according to DIN EN ISO 50001:2011

CERTIFICATION

- ☆ Member of the Brandenburg Environment Partnership
- ☆ 2011: winner of the Brandenburg Future Award
- ☆ 2010: Distinguished by Brandenburg for “Entrepreneurial Excellence”

SPECIAL REQUIREMENTS?

You're looking for a customised packaging solution and have special requirements that go beyond specific inscriptions and/or printing? Thanks to our wide range of expertise and experience, the DERIBA Group can offer you competent advice – and together we can develop product solutions which are tailored to your specific needs. Innovative, individual and inimitable. Contact us!

This ECO Star film laminated brochure is produced in accordance with our high standards for climate neutral products and printed on paper from sustainable forestry.
